Portfolio

## PROFESSIONAL SUMMARY

Senior UX/UI & Product Designer with 5+ years of experience across enterprise SaaS, telecom, cloud platforms, healthcare, logistics, CRM, and AI-driven products. Currently leading end-to-end UX delivery for British Telecom's PNI project at Tech Mahindra, spanning research, design, and engineering handoff. Skilled in simplifying complex workflows, designing scalable platform experiences, and building robust design systems that improve usability, reduce cognitive load, and accelerate product delivery. Upskilling in Gen AI & Agentic AI at IIT Madras, applying AI-powered tools and methods to strengthen product strategy and build future-ready user experiences.

## PROFESSIONAL EXPERIENCE

### Senior UX Designer — Tech Mahindra

Client: British Telecom (BT) — PNI Project

Apr 2026 – Present | Bengaluru, India

- Own end-to-end UX delivery for BT's PNI initiative — from discovery and user research through interaction design, prototyping, and developer handoff.
- Partner with cross-functional product, engineering, and business stakeholders to translate complex telecom requirements into scalable, user-centered design solutions.
- Establish design workflows and handoff documentation standards to ensure consistency and smooth collaboration between design and engineering.
- Apply AI-assisted research and prototyping methods to accelerate design delivery within a large enterprise environment.

### UX / Product Designer (Independent / Freelance) — UXwithAish

Mar 2025 – Present | Bengaluru, India

- Design AI-assisted UX workflows and product strategies using modern AI tools to accelerate ideation, research, and design execution.
- Work hands-on with a range of AI agents (Claude, Stitch, Antigravity, Figma Make, Lovable, Replit) to build and optimize new design skills and streamline end-to-end design processes for small business clients.
- Set up automated workflows using n8n and Zapier to reduce manual effort across research, design, and client delivery tasks.
- Create strategic product flows and high-conversion responsive websites for small businesses using Framer and no-code/low-code tools.
- Actively explore AI-first design methodologies to simplify UX processes, automate repetitive tasks, and build future-ready product experiences.

### UX Designer II — Ollion

Aug 2022 – Feb 2025 | Bengaluru, India

#### Key Projects & Impact

- Tata Neu Connect (Enterprise Internal Platform): Led the complete end-to-end UX for a campaign and segment management system, enabling data-driven marketing execution, audience targeting, and performance tracking at enterprise scale.
- Landing Zone Dashboards (AWS & GCP): Owned full UX lifecycle from research to implementation, simplifying complex cloud provisioning workflows into a single guided dashboard, significantly improving usability and task efficiency.

- Assaya Healthcare Platform: Designed real-time geo-tracking dashboards for COVID marker machines, including live data visualization, map views, access control, and user & device management.
- Goodpack Logistics: Redesigned supply-chain tracking and asset visibility workflows, improving traceability, usability, and operational efficiency.
- Ollibot AI Chatbot: Designed a conversational chatbot for employees to quickly fetch and answer queries from Ollion's internal database using voice, text, and file inputs across both mobile and web.

#### Design Systems & Business Impact

- Built a white-label design system and UX catalog, reducing design-development turnaround time by 40%.
- Supported enterprise client pitches for UOB Singapore, Etops, and DTDC, and conducted stakeholder workshops.

#### Associate UX/UI Designer — mVerve

*Jun 2021 – Aug 2022 | Bengaluru, India*

- Designed enterprise CRM platforms for industrial and manufacturing clients.
- Delivered end-to-end UX across Quotes, Projects, Opportunities, and Data Warehouse modules.
- Built interactive prototypes for client demos and sales enablement.

#### CORE SKILLS

---

##### UX & Product Design

UX Architecture · Product Strategy · Enterprise UX · Workflow Design · Interaction Design · Prototyping · Design Systems · Accessibility · Responsive Design · UX Documentation · End-to-End Delivery · Design Handoff

##### UX Research & Strategy

User Research · Usability Testing · Journey Mapping · Heuristic Evaluation · Stakeholder Workshops · Product Thinking

##### AI & Tools

Figma · Figma Make · Adobe XD · Framer · Stitch · Antigravity · Replit · Claude · Cursor · Lovable · ChatGPT · NotebookLM · Gemini · Midjourney · n8n · Zapier · Miro · Perplexity · Jira · Confluence · Adobe Creative Suite

#### EDUCATION

---

##### Indian Institute of Technology (IIT) Madras

*Postgraduate Program in UX/UI Design, Gen AI & Agentic AI | 2025 – 2026 (Ongoing)*

##### DesignBoat UX/UI School

*Professional Bootcamp in UX/UI Design | 2021*

##### Birla Institute of Technology, Mesra

*Bachelor of Architecture (B.Arch) | 2013 – 2018*

#### ACHIEVEMENTS & LEADERSHIP

---

- 2 Spot Awards for excellence in UX delivery and project impact.
- Recognized for Landing Zone V2 platform usability improvements.
- Core member of DEI (Diversity, Equity & Inclusion) Council – India, leading engagement and culture-building initiatives.

#### CERTIFICATIONS

---

- Visual Design: The Ultimate Guide
- UX Design Foundations – UXcel
- Object Oriented UX (OOUX) Fundamentals
- Mastering Human-Computer Interaction (HCI)
